

# 臺南市學校無線網路 WPA2 認證設定方式

## (適用 Andriod 作業平台手機)

目前臺南市學校使用 WPA2 認證的 SSID 如下：

TN-Teacher (取得資訊中心配發的 IP)

設定方式如下：

| 1. 點選手機的「無線與網路」                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 2. 點選「無線與網路」                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|  A screenshot of an Android phone's settings menu. The title bar at the top says '無線和網路設定' (Wireless and Network Settings). The time is 11:34. The menu items are: '飛航模式' (Airplane Mode) with a checkmark icon, 'Wi-Fi' with a green checkmark and '已連接至 TN-Guest' (Connected to TN-Guest) below it, 'Wi-Fi 設定' (Wi-Fi Settings) which is highlighted with a red rectangular box, '藍牙' (Bluetooth) with a checkmark icon, '藍牙設定' (Bluetooth Settings), '網路共用與可攜式無線基地台' (Network sharing and portable Wi-Fi hotspot), and 'VPN 設定' (VPN Settings). |  A screenshot of an Android phone's main settings menu. The title bar at the top says '設定' (Settings). The time is 11:33. The menu items are: '無線與網路' (Wireless & Networks) which is highlighted with a red rectangular box, '通話設定' (Call Settings), '聲音' (Sound), '顯示' (Display), '位置與安全' (Location & Security), '應用程式' (Apps), and '帳戶與同步處理' (Accounts & Sync). |

3. 按住要連線的 SSID 名稱 (如 TN-Teacher) 。

4. 點選「修改網路」。

5. EAP 方法選擇「PEAP」

6. 階段 2 驗證選擇「MSCHAPV2」

7. 識別輸入「個人臺南市 E-mail 帳號」

例如 : [kawsing@tn.edu.tw](mailto:kawsing@tn.edu.tw)

匿名識別輸入同樣輸入 E-mail 帳號  
輸入 E-mail 帳號的密碼
